

NEW BRITISH BOARD OF AGREEMENT CERTIFICATE FOR THERMAL DRY WALL MEMBRANE.

Basement Systems, always at the forefront of Basement Waterproofing and Basement Environment issues are currently launching a series of new products.

Thermal Dry Wall Membrane, launched last year has met with fantastic success on both sides of the Atlantic. This is the only Cavity Drainage Membrane System specifically for basements to have thermally insulating properties BY VIRTUE OF CLOSD AIR CELLS AND A HEAT REFLECTING FOILE LAYER.

This product was granted a New British Board of Agreement Certificate Recently resulting in THE ONLY complete basement waterproofing system (drained cavity method) to have attained this accolade. The complete systems consists of Waterguard under-floor drainage channel, the Supersump - sump and pump system with battery back up an audible alarm, the Thermal Dry Wall Membrane and sealing tape, plus special 'grip fixings' to allow for easy dab and bond plaster boarding.
